PowerTrakGrow

X3 & X3 PLUS

The X3 and X3 PLUS grow tubes are the most versatile grow lights on the market. The X3 is a T5 replacement tube compatible with most T5 grow fixtures on the market, at 27 watts per tube the X3 almost triples the PPFD at half the power.

The X3 Plus series self contained tubes can be arranged in multiple color configurations for Veg or Flower with four pure color options available; White, Blue, Red & Mix (Red,Blue,IR). PTG will custom manufacture fixture chassis to create up to 20 tube arrays with PPFD up to 1100 umol (28W). Ideal for vertical veg and flower applications at a fraction of the cost of the competition. Daisy chain up to 8 tubes from one power source for simple plug and play installation with no need for electrical infrastructure upgrades.
