# PowerTrakGrow

Full spectrum (Red, Blue, UVB, Infrared, White and Red Laser) control allows growers to set color intensities and timing. Apply your recipe, set it & forget it.

IP 44 Waterproof Unibody Design

Red Laser Technology stimulates photosynthesis, enhances Emerson effect, reduces flowering time, surface damage healing and hinders diseases/bacteria & mold growth

Power, WiFi and UVB LED indicators

The highest Eff (PPF, Photosynthetic Photon Flux Efficacy) of 2.3~2.7  $\mu\text{mol}/\text{J}$  available. X7 offers complete custom control of a light spectrum for vegetative growth stages (blue spectrum controls), leafy vegetables and for flowering stages (red laser/infrared/uvb spectrum controls).

Coupon Code:

**PTG19**

10% OFF

WiFi connectivity allows for app connectivity to control light spectrum and create recipes

Power cord port

Heat sink design transfers heat away from the device regulating the device's temperature.
